

## READ WHAT CUSTOMERS HAVE TO SAY...

*"Last year I had a bit of a "down" period, I was not having any fun anymore, I noticed I was literally losing it. [I had the GAINSWave] and the results are staggering."*

Ronald S. (Producer) - Miami, FL

*"I cannot begin to tell you how amazed I am with the results of the GAINSWave. I had the treatment, and I saw a difference making love to my wife that very night!"*

Thomas W. (Athlete) - Los Angeles, CA

*"I am a man in my 40s. I wouldn't say I have ED, but my wife and I both noticed that things were not quite "as good," as they used to be. It was taking longer to become aroused, and "getting ready" a second time almost impossible. I heard a radio commercial about the GAINSWave, and decided to give it a shot. Man, was I happy I did, my wife says our sex life is the best it has been since our Honeymoon!"*

Eric T. (CEO) - Portland, OR

# CLINICAL RESEARCH

“Multinational clinical trials demonstrated it is a safe, effective, and well-tolerated treatment for erectile dysfunction (ED), which includes men who do not respond to type-5 (PDE-5) inhibitor (Viagra).”

- *Urology Times, Oct 1 2015*

“Treatment is effective even in patients with severe erectile dysfunction who are PDE5i non responders.”

- *The Journal of Urology, May 2016*

The *Scandinavian Journal of Urology* published a randomized, double-blind, placebo-controlled study for ED which stated: **“this treatment shows a possible cure in some patients”**

**Urology Times**  
The Leading News Source for Urologists

National Institutes of Health

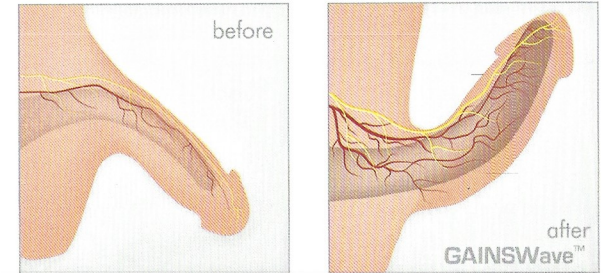

**Men's Health**

- ✓ **Drug Free**
- ✓ **Surgery Free**
- ✓ **Totally Non-invasive**
- ✓ **Simple In-office Procedure**
- ✓ **Long Lasting Results**

# HOW DOES IT WORK?

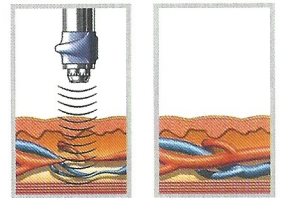

As you get older the blood vessels that supply blood to your penis begin to collapse or breakdown. Good blood flow is essential to erectile function.

The GAINSWave™ improves blood flow by:

- Opening existing blood vessels
- Stimulating the growth of new blood vessels

The increased blood flow results in stronger, harder, and more sustainable erections.
